

# Tutorial 7: More Dockerfile Directives

- CMD
- ENV
- COPY
- USER
- Task: Investigate these directives in the Dockerfile documentation
- Task: Use the CMD directive to make the running your notebook easier

# Image Management

- Reason Docker is popular:  
[hub.docker.com](https://hub.docker.com)
- “pull” command goes there and finds image layers
- One private image by default
  - Pay for more and other services
