

# Case Study: User Interface

Reduced many hours of from-scratch user installation to two commands:

```
./get-cosmosis-and-vm ./cosmosis  
./start-cosmosis-vm ./cosmosis
```

Does not affect any other installation method

# Communication

- By default containers can connect out to world, access internet etc.  
But outside cannot connect inwards.
- Must expose ports with -p flag if want to connect inwards
  - e.g. to run databases, servers, notebooks
