

Tutorial 3: Dockerfiles

- Create an empty directory and a file in it called Dockerfile:

```
FROM ubuntu:latest
LABEL maintainer="your_email@example.com"
RUN apt-get update && apt-get install -y python3 python3-pip
```

- From that directory run

```
docker build -t my-image .
```

★ Tutorial 3: Dockerfiles ★

- Add these line to end of your Dockerfile:

```
RUN pip3 install jupyter ipython numpy
```

- Build again:

```
docker build -t my-image .
```

- Run a container:

```
docker run -it --rm my-jupyter ipython
```
