

# ★ Tutorial 7: Docker Hub ★

- Make an account at [hub.docker.com](https://hub.docker.com)
- `docker build -t username/my-jupyter .`
- `docker push username/my-jupyter`
- Pull your neighbour's image

# Tutorial 8: Exploring Images

- Save your image to disk:  
`docker save -o my-jupyter.tar my-jupyter`
- Extract the tar file:  
`tar -xf my-jupyter.tar`
- Have a look around
- These layers are read-only but can be built on
  - Union File System
