

- Market-leading container framework
- Open source framework and open container format
 - Images easily exported to other frameworks
- Well documented and supported

Tutorial 1: Installation

- Mac/Win: https://download.docker.com/
 - Choose "stable" when you get to a choice
- Linux: https://docs.docker.com/engine/installation/
 - Go to "Server" and find your OS.
 - Select "CE" (community edition) if it gives you two choices
 - May also be in your package manager (yum/apt)
- docker pull ubuntu
