Tutorial 2: Running

- `docker run --rm -it ubuntu bash`

- Run some commands and explore the system, create some files, download some packages, etc.

- In another tab: `docker ps`

- `exit` when complete

- `docker images`

Tutorial 2: Running

- `docker run --rm -it ubuntu bash`

- --rm means the container is deleted after the command stops

  - Data you create in the container is deleted with rm.

  - Otherwise have to delete manually later

  - Alternative: use a single long-running container

- -i and -t make the container properly interactive
